

I created Matrix

Account Number	Pt Name	Task Name	Task Notes	Date Task Requested	Task Inquiry by	Date Task Completed	Task Completed
[Account_Number]	«Expr»	[Task_Name]	[Task_Notes]	«Expr»	«Expr»	«Expr»	«Expr»

I am having issues with TASK NOTES as illustrated below after I running the report

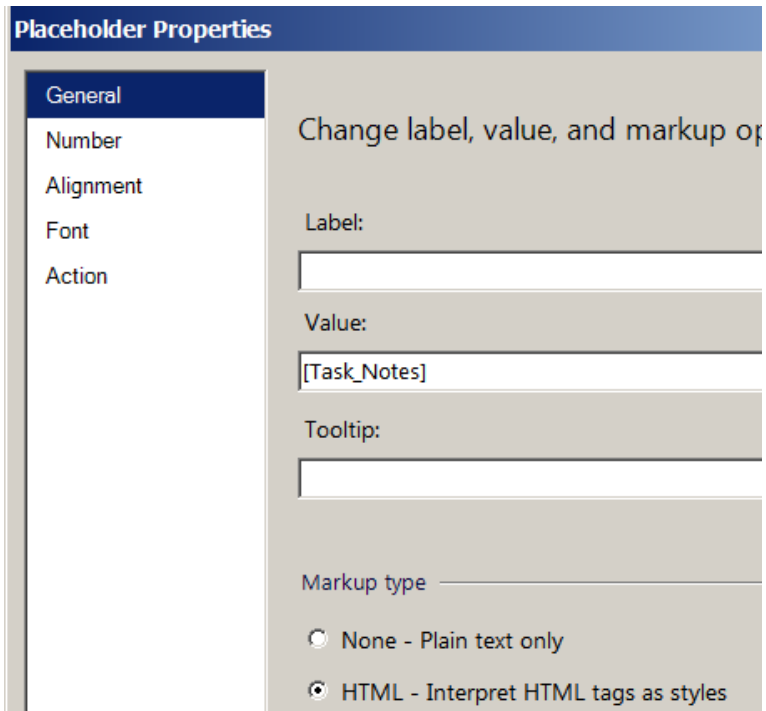

clarification for documentation of morbid obesity on chart. pt's bmi is 47.72, weight 278lbs, height 5'4:. a bmi of > 40 is a comorbidity. Ortho did not address. Dr. Vida consult for medical management. Thanks, Linda

I attempted to fix the problem by adding the following filter and clicking HTML Tag

Expression

Set expression for: Value

```
=REPLACE(Fields!Task_Notes.Value, "&#x0D;",chr(13))
```

This is actually the first AD-HOC report I am writing

Thank you for your assistance and patience
